

Waldschmidt

Waldschmidt offer its customers special paper and hygienic paper products for the medical needs and for the hairdressing trade; they are the inventors of hygienic neck strips and first productions started during the First World War. After the Second World War, in 1947, Hans F. Waldschmidt GMBH & CO. was founded in Hirschaid.

Now they produce on modern production machines several products like end papers for permanent wave, highlightpapers for coloring hair and special neck strips. All products are "Made in Germany".

WAL 00 01 NECK PAPER ROLL - DISPOSABLE

From the inventors of the first hygienic neck strips; this product is made of fresh cellulose and unbleached paper in waterproof quality. The glue on the strips is made of natural latex mixed with water, for a complete environmental product.

Packed in a 5 rolls set, each roll is made of 100 strips and is 67 mm wide. 20 sets per carton, 20 cartons per pallet.

For a correct handling procedure:

1. Hold the strip on the outside, stretch it lightly and wrap it around the client's neck securely (for the best adhesion, please stretch the glue areas as well);
2. Press both glued areas together: make sure they fit securely around the neck to keep hair away;
3. Fold the neck strip over the cape.
